INTERESTS

- **Programming and Cybersecurity**

👤 SUMMARY

Results-driven Backend Developer with 5+ years of experience building scalable web applications using Django, DRF, and Python. Skilled in API design, database optimization (PostgreSQL/MySQL), and security implementation (JWT, OAuth2, OWASP). Experienced with Docker, AWS, and Celery for async processing. Passionate about writing clean, efficient code and delivering high-performance backend systems handling 100K+ daily requests.

🚀 SKILLS

Html · Css · Javascript · Python · Assembly

Django · Django REST Framework

PostgreSQL · MySQL

Docker · Nginx · Linux · Git

Celery · Api Testing · Security Review
